4 (1): Please set out the changes that you consider are necessary to make the Northampton Local Plan Part 2 Submission Draft document legally compliant and / or sound including revised wording of any policy text, and reasons why the proposed change would make it legally compliant and/or sound. Please be as precise as possible.

We understand that the Environment Agency considers that the area served by Anglian Water is an area of serious water stress as defined in the Environment Agency 2013 'Water stressed areas final classification report'. Therefore we would fully support the optional water efficiency standard being applied within the Northampton Local Plan area.

Anglian Water as a water company is keen to encourage increased water efficiency/re-use as part of new residential developments. To support this we are offering financial incentives for residential developers that demonstrate that water use would be 100 litres/per person/per day at the point of connection.

As outlined in our current Developer charges the fixed element of zonal charge for water supply would be waived where this can be demonstrated. We are also actively working with developers to install green water systems in new homes including rainwater/stormwater harvesting and water recycling systems. Further details of Anglian Water's approach to green water proposals is available to view at:

<https://www.anglianwater.co.uk/developers/green-water.aspx>

It is therefore proposed that Policy 5 be amended as follows:

'For residential development, proposals should demonstrate that dwellings meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day, as set out in Building Regulations Part G2

Water reuse and recycling and rainwater and stormwater harvesting and other suitable measures should be incorporated wherever feasible to reduce demand on mains water supply.'

Please note your representation should cover succinctly all the information, evidence and supporting information necessary to support / justify the representation and the suggested changes, as there will not normally be a subsequent opportunity to make further representations based on the original representation at publication stage.

Please be as precise as possible.

Policy 6 as drafted states development proposals should comply with the requirements of Guidance and Standards for surface water produced by Northamptonshire County Council as Lead Local Flood Authority. However the policy does not make reference to relevant documents produced by Anglian Water as sewerage undertaker for the Northampton Borough Administrative area relating to surface water management.

We would ask that developers are also asked that to follow the requirements of Anglian Water's Surface Water Policy, SuDs Adoption Handbook and Sewers for Adoption Version 8 or successor documents.

This is particularly important where SuDs features are proposed to adopted by Anglian Water or it is proposed that surface water is to be discharged to a public sewerage network. (We would only accept a surface water connection to the public sewerage network in exceptional circumstances where it can be demonstrated that there are no feasible alternatives.)

It is therefore suggested that the first paragraph of Policy 6 be amended as follows:

'and proposals which comply with relevant guidance for flood risk management and standards for surface water **produced by the LLFA and Anglian Water (or successor documents)** will be supported'

'96. In addition, NCC has published Local Standards and Guidance for Surface Water Drainage in Northamptonshire¹¹. The guide is a living document, which is updated regularly with new emerging information. The guide is designed to assist developers in the design of surface water drainage system and to support local planning authorities in considering drainage proposal for new developments.

97. Anglian Water as sewerage company for the area has also produced surface water management guidance in relation to the evidence that applicants will be required to provide to demonstrate compliance with the surface water hierarchy. With Anglian Water's SuDs Adoption handbook setting out the circumstances in which SuDS features would be adopted by Anglian Water.'

We note that Policy 6 states that new development proposals should provide and maintain access for water supply and drainage infrastructure which is fully supported. It is important that the location of existing water and water recycling infrastructure (where relevant) is fully considered as part of the planning application process to ensure that we can continue to maintain existing infrastructure for our customers.

Please note your representation should cover succinctly all the information, evidence and supporting information necessary to support / justify the representation and the suggested changes, as there will not normally be a subsequent opportunity

to make further representations based on the original representation at publication stage.
