LAA1059B and LAA1059C

Both of these sites are bordering existing residential properties on an estate that was designed in order to provide a decent quality of life for the residents of the development. It was recognised that open green areas, trees and vegetation are essential for the mental well being of the residents and for clean air. Removing trees and bushes affects air quality and the ability of the environment to absorb pollution.

Birds Hill Road is already overloaded with traffic as vehicles avoid the A4500 and there are no traffic calming measures. Speeding has been highlighted as an issue and any further development will add to the number of vehicles using this road. There is already a proposal to build a large number of residential properties on the old Emmanuel Middle School site which is far more suitable as a location but I suspect the vehicles from that development will also use Birds Hill Road as a cut through.

The development these two sites will have an adverse impact on the existing residents and the enjoyment of their homes, an increase in noise pollution, air pollution, the destruction of trees and bushes and decimate our quality of life.

Many residents are completely unaware of this consultation and as a result will not have fed back in time for their opinions to have been voiced.

Q6 Which sites do you think should be protected from development? Please state site number(s) – e.g. LAA0999 and tell us why you think each site should be protected from development

Completely unsuitable. These areas are valued by the surrounding residential community for the green space and the enjoyment it provides for all.
