

3 September 2020

Dear Sir

NBC LPP2 Specific Policy 41, LAA1098, para 123 of 195, table figure 20

We welcome your proposal for Ecological Enhancement of the area shown in Figure 20 and would emphasise its importance to prevent pressures and disturbance to the birds referred to in Policy 41.

There is however no mention of Canada Geese who each year (particularly during August and September) use the northern part of this area (and the southern part of the Diocese land adjacent) for stopping en route on their travels. I trust this, along with your other bird surveys referred to, will reduce the offsite mitigation and protect their habitat.

Yours faithfully,

Bill McFarland

Beryl Anderson
