Questions 14 and 17

I hope you will forgive this narrative representation to the consultation document. The comments relates particularly to the numbered questions above.

Upton Country Park.

I think that I am right in saying that the once proposed Upton Country Park has not yet been designated in planning terms. The area in question is now becoming much more used by people engaged in all manner of leisure activities and is a very important resource to the growing local population. I believe that the area would benefit enormously by being allocated as a country park on the Local Plan Part 2. This will make the path of future of leisure developments more straightforward. The zoning will assist in planning applications and will encourage the setup of management arrangements and a management plan.

Than you.

Andy Clarke
