

GROWING TOGETHER NEIGHBOURHOOD PLAN

Publicising Plan Proposal from Thu 28th July to Thu 22nd September 2016

Summary of representations submitted to the independent Examiner pursuant to paragraph 9 of Schedule 4B to the 1990 Act

No	Name / Organisation	Summary of responses
#1	Mrs M Pritchard	Support Plan, especially retention of open spaces; their enhancement with play / activity equipment; for footpaths to be improved, maintained & made safer around the estates
#2	Janice Duffy	There is no provision for a traveller's site, there should be. What is provided for horse owners? eg bridle ways
#3	Mrs K Hatherly	Disappointment that Southfields, which is part of the development, has not been included. In the last year little has been done to improve the area or encourage community participation. Southfields needs pathways cleared and made safe, the shopping area needs improvement. Don't want to walk past the pub; the area around the shops is so depressed. Only one bus service, it does not run on a Sunday. Please consider including Southfields in this exciting project.
#4	Mr Roger Hayman	Why does this plan not include Thorplands?
#5	Mr Thomas Evans	Support Plan. Have been resident in the eastern district most of life. Have sporadically lived in town and been impressed by the improvements. Recently moved back to the eastern district and wondered when something might be done with all empty land sites e.g. unused school sites Emmanuel and Lings. Glad about the Plan. Need development and a new lease of life in the area. Plan is a great start.
#6	Marine Management Organisation	No comments.
#7	Northamptonshire Police	Happy with the final version, no comments to add

#8	Anglian Water	<p>Policy DEV1: Priority Development Areas- All brownfield sites identified for redevelopment must take the opportunity to completely remove any surface water flows currently discharging to the foul or combined sewerage network. The demolished site should be, where practical, treated as if it was greenfield. Brownfield sites must still follow the surface water management hierarchy to determine whether infiltration techniques or a connection to a watercourse can be utilised prior to the consideration of a connection to a dedicated public surface water sewer where capacity is available. This ensures there is a sustainable drainage strategy for the lifetime of the development and reduces the risk of pollution and flood risk.</p>
		<p>Policy DEV1 outlines criteria which will be used to determine planning applications for development on these sites. However at this stage the precise mix of use(s) which is likely to come forward is currently unknown. Therefore Anglian Water would wish to comment further as part of the planning application process on any proposals which may come forward on these sites.</p>
